Batangas

## [Link to Figma](#)

The "Weatherly" website design is simple, intuitive, and user-focused, presenting weather data clearly and visually appealingly.

### **Consistent Design**

- The blue color scheme creates a calm, reliable feel, ideal for a weather app.
- Icons and fonts are uniform throughout the interface, ensuring a smooth user experience.

### **Key Information Visibility**

- The current weather (32°C) and location (Batangas) are displayed in large, bold fonts, making the most important information easy to spot.
- Additional details like humidity and wind speed are shown clearly below the temperature.

### **User-Friendly Icons**

- Recognizable weather icons, like the cloud with rain, visually represent the weather, making it intuitive for users.

### **Easy Navigation**

- The search bar allows users to quickly change locations with a familiar search icon, enhancing user control.

### **Clean and Simple Design**

- The minimalist layout focuses only on the most relevant information.

### **Readable and Accessible**

- The light blue gradient background contrasts well with the white text, making everything easy to read.
